Why do you need to learn how to write a research paper?

- ✓ In college, you will be asked to write many research papers, and you need to learn what goes into writing a successful paper.
- ✓ Step-by-step directions on how to write research paper

How to perform Research?

- ✓ Observe a natural phenomenon and define a question about it
- ✓ Make a hypothesis, or potential solution to the question
- ✓ Test the hypothesis
- ✓ If the hypothesis is true, find more evidence or find counter-evidence
- ✓ If the hypothesis is false, create a new hypothesis or try again
- ✓ Draw conclusions and repeat—the scientific method is never-ending, and no result is ever considered perfect

Why to do the Research?

It is defined as "intensive search with the purpose of becoming certain". It is a systematic investigation into reality to gain knowledge.

How to perform Research?

- ✓ Observe a natural phenomenon and define a question about it
- ✓ Make a hypothesis, or potential solution to the question
- ✓ Test the hypothesis
- ✓ If the hypothesis is true, find more evidence or find counter-evidence
- ✓ If the hypothesis is false, create a new hypothesis or try again
- ✓ Draw conclusions and repeat—the scientific method is never-ending, and no result is ever considered perfect

Make a story out of it

The Lion and the Cows

Once upon a time there lived four cows in the forest. Everyday they used to graze together in a particular spot. They were all friends. One day a lion saw the cows grazing together.

The lion wanted to eat them so he went to catch them. When the cows saw the lion, all of them fought with him. The lion had to run away.

A few days passed and the cow quarreled between themselves and started grazing separately. One by one the lion killed all of them.

Moral of the Story: Unity is strength

End is the beginning

Before you finish your manuscript, ask yourself the following questions about your research manuscript to ensure that you have included all important information.

1. Is there sufficient detail so that the experiments can be reproduced?
2. Is there excess information that could be removed without affecting the interpretation of the results?
3. Are all the appropriate controls mentioned?
4. Are all appropriate citations included?
5. Is the source of each reagent listed?

Structure of the Research Paper

Section	Purpose of the Section
Abstract	To briefly introduce the reader to the aims of the study, the methodology, results and findings.
Introduction	To state a clear overall purpose for the study, often framed in a discussion of the need the research is satisfying. To define the research question(s) of the study. To give a very brief background of relevant theory and practice for your topic.
Literature Review	To summarize what conclusions have been reached in the research literature and whether different writers agree or not. To highlight main issue and controversies around the problem.
