Guppy fish Distribution

Report

On 14th September 2023, the Department of Zoology at D. P. Bhosale College, Koregaon, organized a significant social activity known as the "Guppy Fish Distribution" to promote mosquito control and raise awareness about mosquitoborne diseases. The event was graced by the esteemed presence of Prof. V. Y. Deshpande, Director of Hindavi Research Centre, Satara and witnessed active participation from students and faculty members.

Introductory speech given by Dr. Mrs. S. P. Nalawade

The primary objective of the event was to distribute guppy fish to students and release them into nearby ponds and water storage areas. Guppies, scientifically known as *Poecilia reticulata*, are small freshwater fish known for their ability to feed on mosquito eggs and larvae, thus contributing to the reduction of mosquite populations naturally. The event commenced with a warm welcome by the Head of the Department of Zoology, Dr. Mrs. S. P. Nalawade. She emphasized the importance of guppy fish in controlling mosquito populations and the role of students in promoting public health. She discussed their breeding habits, feeding patterns, and their impact on mosquito larvae, emphasizing their importance in reducing the spread of diseases like malaria and dengue.

Prof. V. Y. Deshpande, the Chief Guest, appreciated the efforts of the Zoology Department in organizing this event and highlighted the critical role of such initiatives in spreading awareness about mosquito-borne diseases. Then guppy fish were distributed to the students. Each student received a container of guppy fish to release into nearby stagnant water bodies.

Guppy fish distribution to students

Principal Dr. B.S. Chavan addressed the gathering and motivated students to actively participate in creating awareness about mosquito-borne diseases. He stressed the importance of such community-based initiatives in fostering a sense of responsibility among students.

Faculty members, Mr. B.D. Bhosale , N.C.C. officer including Dr. Ms. K. Kamble, Mrs. N. A. Shaikh, and Mr. S.A. Sudnye, actively participated in the even

assisting students in releasing the guppy fish into ponds and water storage areas. Students demonstrated great enthusiasm and dedication throughout the event. They actively participated in the distribution of guppy fish and embraced their role in mosquito control and public health awareness.

The Guppy Fish Distribution Event organized by the Department of Zoology at D. P. Bhosale College, Koregaon, was a resounding success. It achieved its objective of promoting mosquito control through the natural means of guppy fish. The event also succeeded in raising awareness about the dangers of mosquito-borne diseases and the importance of community engagement in controlling them.

Such initiatives serve as a testament to the commitment of educational institutions and their faculty members in contributing to the well-being of the community. It is hoped that the impact of this event will ripple through the region, leading to a healthier and safer environment for all.
