Celebration of World Mosquito Day

Report

The Department of Zoology at D. P. Bhosale College, Koregaon, commemorated World Mosquito Day on August 21, 2023, with a highly informative and enlightening event. The highlight of the event was a comprehensive lecture delivered by Mr. S.A. Sudnye, a distinguished expert in the field. The purpose of the event was to raise awareness about the various species of mosquitoes, the diseases they transmit, and the importance of mosquito control.

Mr. S. A. Sudnye's lecture proved to be a valuable resource for the attendees as he shared his expertise on different species of mosquitoes and the diseases they are known to carry. The lecture commenced with an overview of the historical significance of World Mosquito Day, which commemorates the ground-breaking discovery made by Sir Ronald Ross in 1897 that implicated mosquitoes in the transmission of malaria. This discovery laid the foundation for the understanding of mosquito-borne diseases and paved the way for revolutionary advancements in public health.

During the lecture, Mr. Sudnye provided an in-depth exploration of various mosquito species, highlighting their distinct characteristics, habitats, and behaviours. He emphasized the ecological role of mosquitoes in various ecosystems while also shedding light on the negative impacts they can have on human health. The pivotal role of mosquitoes in transmitting diseases such as malaria, dengue fever, Zika virus, and West Nile virus was discussed in detail, underscoring the urgent need for effective mosquito control strategies.

One of the most engaging aspects of the lecture was the use of a pictorial presentation. Mr. Sudnye employed vivid images and diagrams to visually illustrate the diverse mosquito species, their life cycles, and the diseases associated with them. This approach effectively engaged the audience and helped them grasp complex concepts with ease.

The event was attended by a diverse audience comprising students and faculty members. The engagement and interaction during the Q & A session reflected the attendees' keen interest in the subject matter. Many participants asked insightful questions about mosquito control methods, the latest advancements in vector-borne disease research, and the potential impact of climate change on mosquito populations.

The Department of Zoology, under the leadership of Dr. Mrs. S. P. Nalawade, Head, Department of Zoology, expressed their gratitude to Mr. S. A. Sudnye for his enlightening lecture and his commitment to educating the community about the importance of mosquito control. The

event concluded with a renewed sense of responsibility among the attendees to contribute to efforts aimed at reducing mosquito-borne diseases through awareness and responsible practices.

World Mosquito Day celebration at D. P. Bhosale College, Koregaon, proved to be an educational and thought-provoking event. The insightful lecture by Mr. S.A. Sudnye, along with the visual aids, enriched the audience's understanding of mosquito species and the diseases they transmit. The event successfully fulfilled its objective of raising awareness and fostering a sense of collective responsibility in combatting mosquito-borne diseases.
