

SHIVAJI UNIVERSITY, KOLHAPUR.

Accredited By NAAC with 'A' Grade

National Education

Policy (NEP) 2.0

Syllabus for

B. Sc. Zoology

Syllabus to be implemented from

June 2024 onwards.

Shivaji University, Kolhapur
Bachelor of Science Credit Framework
First-Year (B. Sc. I-Zoology)

SEM (Level)	COURSES			OE	VSC/SEC	AEC/VEC/IKS	OJT/FP/CEP /CC/RP	Total Credits	Degree/Cum. Cr. MEME
	Course-1	Course-2	Course-3						
SEM I (4.5)	ZOO 101 Paper I Animal Diversity (2) ZOO 102 Paper II Cell Biology (2) ZOO PR 103 Practical I (2)	DSC I (2) DSC II (2) DSC P1(2)	DSC I (2) DSC II (2) DSC P1 (2)	ZOOOE 101 OE I (2) Diet and Nutrition		IKS I (2) Introduction to IKS			UG Certificate 44 Credits
Credits	4 (T) + 2 (P) = 6	4 (T) + 2 (P) = 6	4 (T) + 2 (P) = 6	2		2		22	
SEM II (4.5)	ZOO 201 Paper III Genetics (2) ZOO 202 Paper IV ecology, ethology, evolution, entomology (2) ZOO 203 Practical II (2)	DSC III (2) DSC IV (2) DSC P II (2)	DSC III (2) DSC IV (2) DSC P II (2)	ZOOOE 201 OE II (2) Vermiculture		VEC I (2) (Democracy, Election and Constitution)			
Credits	4 (T) + 2 (P) = 6	4 (T) + 2 (P) = 6	4 (T) + 2 (P) = 6	2		2		22	
Total	8(T)+4(P)=12	8(T)+4(P)=12	8(T)+4(P)=12	2+2=4 (T/P)	--	2+2=4	--	44	

Exit Option: If a students choose to exit after B. Sc. I, he/she will be awarded an UG certificate after successful completion of 44 credits + a 4 credits course of NSQF/ Internship / a Skill course

B. Sc. I Structure in Zoology NEP 2.0

Discipline-specific Courses

Sr. No.	Semester	Course Code	Course Title	Credits	Hours of teaching	Marks
1.	I	ZOO 101	Paper I Animal Diversity	2	30	50
2.		ZOO 102	Paper II Cell Biology	2	30	50
3.		ZOOPR 103	Practical I	2	60	50
4.	II	ZOO 201	Paper III Genetics	2	30	50
5.		ZOO 202	Paper IV Ecology, Ethology, Evolution and Entomology	2	30	50
6.		ZOOPR 203	Practical II	2	60	50

Program Outcomes (POs): B. Sc. Zoology

PO1: The students will learn about the basic concepts of Zoology and a platform for the entry of students in post-graduation studies, competitive examinations, paramedical fields, and agricultural business will be prepared.

PO2: Students will understand the concepts in zoology and be able to understand, classify, describe, and discuss different aspects of zoology like animal Phyla, conservation of animals, animal physiology, etc.

PO3: Students can apply their knowledge to solve problems related to genetics, and ecology and become competent to apply their knowledge of physiology, ethology, and entomology in their day-to-day life.

PO4: The students acquire various practical skills and dissection skills.

PO5: The students will be able to diagnose problems related to environmental issues, health and hygiene, agriculture and pest management, conservation of natural resources, etc., and try to solve them with scientific aptitude.

PO6: The students will apply their knowledge of zoology for the development of entrepreneurship and also practice it in their day-to-day lives.

Program Specific Outcomes (PSOs): B. Sc. I Zoology

PSO 1: The students will learn about animal diversity, cell biology, genetics, ecology, ethology, evolution, and entomology.

PSO 2: The students will understand various basic concepts and be able to describe them.

PSO 3: The students can apply their knowledge to classify, distribute, and organize the animals.

PSO 4: The students can solve the problems related to patterns of heredity, pedigree analysis, etc.

PSO 5: The students will acquire skills like sketching the diagrams, karyotype analysis, dissection, and other practical skills.

B. Sc. Part – I Semester – I
ZOOLOGY Paper - I
ZOO 101 ANIMAL DIVERSITY

Theory: 30 hrs.

Marks-50 (Credits: 02)

Course Objectives (COs): Animal Diversity

The course on animal diversity is aimed at making the student to:

1. understand the concept and importance of biodiversity
2. Enable the students to identify the similarities and differences among the animals in different Phyla and classes.
3. develop sensitivity for the conservation of biodiversity in their day-to-day life.
4. equip the students with the skills of dissection.

Unit I

(10 Hrs)

Principles of classification, Five Kingdom classification
Binomial nomenclature
Levels of Organizations in Kingdom Animalia
Germ layers and coelom concept
Different modes of nutrition
Non-chordates concept, Phyla with prominent characters and examples
Phylum Chordata: Characters, subphyla/ classes with prominent characters and examples
Difference between non-chordates and chordates
Generalized body plans of non-chordates (Annelida/Arthropods) and chordates

Unit II

(10 Hrs)

Biodiversity concept and its importance
Zoogeographical regions and distribution of animals: Global and Indian biodiversity.
Extinct and threatened animals
Hotspots of biodiversity and Biodiversity Centres
Need for conservation and conservation strategies

Unit III

(10 Hrs)

Cockroach: a representative of non-chordates
Habit and habitat
Systematic position
Morphology
Anatomy: Digestive system, nervous system, blood vascular system, Respiratory system, excretory system, reproductive system, and receptor organs.

B. Sc. Part – I Semester – I
ZOOLOGY Paper - II
ZOO 102 CELL BIOLOGY

Theory: 30 hrs.

Marks-50 (Credits: 02)

Course Objectives (COs): Cell Biology

The Course on cell biology is aimed at making the students to:

1. understand the general organization of cell organelles and their functions.
2. apply their knowledge to study the functioning of a cell and cell divisions and its regulation.
3. analyze the role of cell organelles and cell cycle checkpoints with examples of anemia, diabetic wounds, and cancer.
4. equip the students with skills like handling the microscope, micrometry, staining techniques, etc.

Unit I

General organization of cell

(10 Hrs)

1. Organization of prokaryotic and eukaryotic cells
2. Nucleus: nuclear membrane, nucleoplasm, chromatin, and nucleolus
3. Chromosome: morphology of metaphase chromosome and its organization (Solenoid model)
4. Cytoskeleton

Unit II

(10Hrs)

Ultra-structure and functions of

1. Plasma membrane (Fluid Mosaic Model)
2. Mitochondria
3. Endoplasmic reticulum
4. Golgi complex
5. Lysosome
6. Ribosome

Unit III

(10 Hrs)

1. Concept of Cell cycle and its regulation
2. Mitosis
3. Meiosis
4. Abnormalities in cell division: Hypoproliferation (Anemia and diabetic wound) and Hyperproliferation (Cancer)

B. Sc. Part – I Semester – I
ZOOLOGY Practical– I
ZOOPR 103 (ANIMAL DIVERSITY AND CELL BIOLOGY)

Practical: 60 hrs.

Marks-50 (Credits: 02)

I: Practical course based on Animal Diversity

1. One example of each non-chordate phyla
2. One example of each chordate subphyla/class
3. One example of each mode of nutrition
4. Demonstration of cockroach digestive system
5. Demonstration of cockroach nervous system
6. Demonstration of mountings of mouth parts, trachea and cornea of cockroach
7. Placing the animals on a world map according to zoo-geographical distribution
8. One example of each rare, endangered, critically endangered, and extinct animal as per the red data book.

II: Practical course based on Cell Biology

9. Cytological experiments

- a. Study of light microscope: Principles of microscopy; study of its parts; focusing of a slide at low and high power and study of Image Formation.
- b. Micrometry: Measuring size of microscopic structures.
- c. Study of osmosis using salt solutions

10. Cytological Preparations:

- a. Study of facultative heterochromatin (Barr body)
 - b. Isolation of Nucleus and Staining of the nucleus by any nuclear stain
 - c. Staining of mitochondria by Janus green B in oral mucosa or any suitable tissue.
11. Study of mitosis in onion root tips
 12. Study of meiosis – observation of permanent slides
 13. Study of anemia and diabetic wound and histology of cancerous tumor

B. Sc. Part – I Semester – II
ZOOLOGY Paper - III
ZOO 201 GENETICS

Theory: 30 hrs.

Marks-50 (Credits: 02)

Course Objectives (COs): Genetics

The course in Genetics is aimed to make the students to:

1. understand heredity and variation.
2. apply their knowledge to draw the genetic crosses based on patterns of heredity.
3. Culture the *Drosophila* and handling skills among the students.
4. enable the students to develop
 - a. a gene map using data of crossing over and linkage study,
 - b. draw, and analyze pedigree
 - c. analyze karyotypes.

Unit I

(10 Hrs)

Molecular Basis of Genetic Information (Central Dogma)

Mendel's work and Principles of Inheritance

Test cross, back cross, and reciprocal cross

Incomplete dominance and co-dominance,

Unit II

(10 Hrs)

Gene interaction (Epistasis): Supplementary gene interaction. Complementary gene interaction

Multiple alleles: definition, ABO blood group system, and coat colour in rabbit,

Sex-linked inheritance: definition, Haemophilia, and colour blindness

Linkage and crossing over: Linkage, types of linkage and process of crossing over, Cytological evidence of crossing over.

Unit III

(10 Hrs)

Chromosomal Abnormalities

Human karyotype analysis

Numerical abnormalities: Aneuploidy and Polyploidy,

Chromosomal aberrations: Deletion, Duplication, Inversion, Translocation,

Pedigree analysis

Sex determination

Chromosomal theory of sex determination, Genic balance theory, Haploidy-Diploidy mechanism, Environmental sex determination.

B. Sc. Part – I Semester – II
ZOOLOGY Paper - IV
ZOO 202 (ECOLOGY, ETHOLOGY, EVOLUTION, AND ENTOMOLOGY)

Theory: 30 hrs.

Marks-50 (Credits: 02)

Course Objectives (COs): Ecology, Ethology, Evolution, and Entomology

The Course in ecology, ethology, evolution, and entomology is aimed to make the students to:

1. understand the basic concepts.
2. enable the students to identify the amazing features of the insect world.
3. train students to arrange the animals on a geological time scale.
4. mold the student to apply their knowledge to construct food chains, food webs, and ecological pyramids.

Unit 1

2. Ecology (10 hrs.)

- a. Introduction and Scope of Ecology
- b. Basic concepts in ecology: Biosphere, biome, Species, Population, Community, Niche
- c. Ecosystem: Definition, concept, types, pond ecosystem, and grassland ecosystem
- d. Food chain, food web
- e. Ecological pyramids
- f. Ecological adaptations
- g. Symbiotic relationships

Unit 2

3. Ethology and Evolution (10 hrs.)

Ethology

- a. Introduction to the study of animal behavior
- b. Mimicry in Monarch butterfly and stick insect
- c. Camouflage in chameleon and Leaf insect
- d. Courtship behavior in scorpion and weaver birds
- e. Social behavior in honeybee

Evolution

- a. Types of fossils, Formation and dating of fossils
- b. Incompleteness of Fossil record
- c. Geological time scale

Unit 3

4. Entomology– (10 hrs.)

- a. Introduction to Entomology

- b. Brief morphology of insects (Grasshopper) and types of mouth parts
- c. Entomophagy: Introduction, Nutritional value, economic importance, Examples.
- d. Wonders in insects
 - i. Mud wasp
 - ii. Praying mantis
 - iii. Giant cockroach
 - iv. Ladybird beetle
 - v. Firefly
 - vi. Parasitoids- *Apanteles* in *Helicoverpa*

B. Sc. Part – I Semester – II
ZOOLOGY Practical– II
ZOOPR 203 (GENETICS AND ECOLOGY, ETHOLOGY. EVOLUTION,
AND ENTOMOLOGY)

Practical: 60 hrs.

Marks-50 (Credits: 02)

I. Practical based on Genetics

1. Study Mendel's work with the help of different coloured beads and other simulations.
2. Examples based on Gene mapping using data of crossing over and linkages
3. Study of sex-linked inheritance by pedigree study.
4. Study of normal human spread chromosomes and sex determination
5. Identification of genetic syndrome by karyotype analysis
6. Identification of chromosomal aberration by studying karyotype
7. Identification ABO blood group
8. *Drosophila* culture, handling, Life cycle, and identification of male and female *Drosophila* and mutants (After induction of mutation)
9. Examples based on Gene interactions and Multiple alleles

II. Practical based on Ecology, Ethology, Evolution, and Entomology

10. **Ecology** – Preparation of the following about pond and grassland ecosystems.
 - a. Arranging the organisms in the Food chain and food web
 - b. Arranging the organisms in different trophic levels of Ecological Pyramids

11. Ethology –

- a. Mimicry in – monarch butterfly and stick insect
- b. Castes of Honey bee

12. Evolution –

- a. Types of fossils
- b. Arrangement of the animals as per the Geological Time Scale

13. Entomology –

- a. Types of insect Mouthparts (House fly, Honeybee, Mosquito, Butterfly, cockroach)
- b. Entomophagy – Examples of edible insects according to theory
- c. Wonders in insects (Based on theory)

Visit to sea shore or any suitable place to study the Ecosystem, Animal diversity, Animal Behavior, etc

EXAMINATION PATTERN FOR DSC ZOOLOGY

1) **PATTERN:** Theory and practical examinations will be conducted at the end of each semester. Internal examinations will be conducted after completing about half of the syllabus.

2) **MEDIUM OF INSTRUCTION:** The medium of instruction shall be in English.

3) **STRUCTURE OF COURSE:** B.Sc. I – Zoology theory and practical and Internal Assessments as per the Framework Set by the Shivaji University

SEMESTER-I (Theory and Practical)

Sr. No.	Subject	Internal Exam	University Exam	Total	Credits
1	ZOO 101 Paper - I	10	40	50	2
2	ZOO 102 Paper - II	10	40	50	2
3	ZOOPR 103 Practical I	--	50	50	2
				Total=150	6

SEMESTER-II (Theory and Practical)

Sr. No.	Subject	Internal Exam	University Exam	Total	Credits
1	ZOO 201 Paper - I	10	40	50	2
2	ZOO 202 Paper – II	10	40	50	2
3	ZOOPR 203 Practical I	--	50	50	2
				Total=150	6

Minimum Marks required for passing

	Internal Exam	Theory	Practical
Maximum Marks	10	80	50
Minimum Marks	04	28	18

SCHEME OF EXAMINATION

The question paper will be set on the entire syllabus and preferably covering each unit of syllabi.

COMMON NATURE OF QUESTION FOR THEORY PAPER:

SEMESTER – I Zoology Paper (I, II)

SEMESTER – II Zoology Paper (III, IV)

Q. 1	Multiple Choice Questions (Eight questions)	08
	a.	
	b.	
	c.	
	d.	
	e.	
	f.	
	g.	
	h.	
Q. 2	Long answer questions (Attempt any two)	16
	a.	
	b.	
	c.	
Q. 3	Short Notes (Attempt any four)	16
	a.	
	b.	
	c.	
	d.	
	e.	
	f.	

SKELETON PAPER FOR PRACTICAL EXAMINATION

B. Sc. Part – I Semester – I

ZOOLOGY Practical - I

ZOOPR 103 (Animal Diversity and Cell Biology)

Marks-50

Que No. 1 Arrange the animals in their respective phyla (10 Non-chordates)/ Subphyla/ Classes (10 Chordates)	10
Que No. 2 Cytological experiments	08
Que No. 3 Cytological Preparation	07
Que No. 4 Distribution of animals with their zoogeographical regions	05
Que No. 5 Categorization of animals as per the abundance/ Mode of nutrition	05
Que No. 6 Stained Cytological Preparation of Mitosis	05
Que No. 7 Spotting	05
a. Identify and Describe (Any part of the digestive/ Nervous system of a Cockroach)	
b. Identify and describe (Any mouth part/ trachea/ cornea of cockroach)	
c. Identify and describe (Any one part of the light microscope)	
d. Identify and describe (Stage of meiosis)	
e. Identify and describe (Anamia/ diabetic wound/ histological slide of cancer)	
Que No. 8 Journal	05

B. Sc. Part – I Semester – II

ZOOLOGY Practical - II

ZOO PR 203 (Genetics, Ecology, Ethology, Evolution and Entomology) Marks-50

Que No. 1 Determination of blood group according to ABO blood group system/ Drosophila culture-related experiments	06
Que No. 2 Questions based on karyotype study/ Gene Mapping/construction of pedigree	06
Que No. 3 Construction of food chain/food web/ Ecological Pyramids.	05
Que. No. 4 Experiments based on monohybrid/ dihybrid cross	06
Que No. 5 Example in Genetics	07
Que No. 6 Identification (Based on Unit II)	10
Que No. 7 Excursion Report	05
Que No. 8 Certified Journal	05
